## Tokenomics

### Why should I invest in SmurfsINU?

First of all, SmurfsINU has been specially designed at every stage to be the safest and most loved project. As a result of in-team meetings and social research, it was decided that the tax fee would be 0%. Since the tax fee is 0%, large wallets are not reserved under the name of marketing, team, partnership. Only a 2.5% wallet is reserved for SmurfsINU to be listed on major exchanges. With the decision of our finance team, SMURF token will be sold with BUSD parity and liquidity will be locked for at least 3 years. In this process, where all world economies have started to tighten monetary policy, unstable parities may show great decreases. This is a critical decision we have made to protect SmurfsINU and our investors. SmurfsINU's biggest goal is to be listed on a major exchange as soon as possible. (Binance is such a long story. It's too early to talk about it). Developer is a former AxieInfinity member and provided all the necessary infrastructure for it. The SmurfsINU project will be financed by NFT sales, stakes and sponsorships in the SmurfsVerse universe. Our finance team secured special sponsorship deals specifically for the FIFA World Cup Qatar 2022. One of our biggest goals is to be the mascot of the tournament and to sign a partnership with a big world star.

Total Initial Supply: 1,000,000,000,000,000 SMURF

1. PancakeSwap Liquidity: %97,5 of Total Supply, Locked for a year

2. Reserved for major exchange listings: %2,5 of Total Supply

SmurfsINU Buy/Sell tax fee is designed to be %0

(The only valid token of the SmurfsINU ecosystem is SMURF. Only SMURF tokens will be used in all DeFi and SmurfsVerse events.)
